INFO-TECH CITROËN Sport C2 R2 N° 33/07

Subject : Gearbox, throw out bearing guide.

We ask you to pay attention for the cleaning of the throw out bearing guide (picture below).

Don't use a brake cleaner, the phosphation (surface treatment) don't accept it, it could be damaged. We ask you to use « WD40 », or equivalent lubricating oil for the cleaning.

We remind you also to apply copper grease (generously) on it and on the throw out bearing, and to play 3 or 4 times with the clutch fork before to assembly the gearbox on the engine.

Thank you for your attention.

S. BARRAUD, le 19/09/07
